Buyer notes

Ask whether the grade is total boswellic acids or AKBA, because buyers often confuse the two. Request the HPLC report, heavy metals and residual solvent results for each lot.

Percentages shown are typical commercial grades. The exact grade and test method are confirmed on the COA / TDS for each order.

Before you book

Weight per container depends on bulk density, pack size and whether the cargo is palletised. We quote a load only after the manufacturer confirms the pack size and the forwarder confirms the container. Wooden pallets must be ISPM-15 heat-treated and stamped, or use plastic pallets. Use a food-grade, clean, dry, odour-free container, with a liner and desiccant for sea freight of spices, seeds and powders.
